TECHNOFORGE
Forging the future together

PRECISION MACHINED COMPONENTS

Made of Bar Stock, Forging &
Casting Products

AN ISO 9001:2015 CERTIFIED

About STELLAR

TOTAL MANUFACTURING AREA
5577 SQ.MTR | 32% SPARE CAPACITY

STELLAR is a family-owned business enterprise, established in 2019 with a clear objective to serve a global clientele, specifically for ready-to-assemble precision machined components.

Partners are graduates in Mechanical Engineering with 40+ Year experience.

STELLAR is in the Machined component business specializing precision, quality, and reliability. The latest generation machines and software drive our state-of-the-art, Forging and machine shop. This allows us to produce an infinite range of precision-forged machined components within the shortest possible time frame. This technology combined with the skill and experience of our engineering team ensures the exacting standard of our work and allows us to provide the most efficient production times possible.

Our commitment to implementing quality systems ensures that our customers receive parts correct to drawing every time.

OUR VISION

We recognized for our innovation, uncompromising quality, and commitment to environmental sustainability. We aim to build long-term partnerships by consistently exceeding expectations and driving advancements in the forging and machining industry.

OUR MISSION

To deliver superior precision-forged and machined components by leveraging advanced technologies, stringent quality standards, and customer-focussed solutions. We strive to empower our clients across diverse industries with reliable, high-performance products that contribute to their success and sustainability.

Our CAPABILITIES

Forging Capabilities

Range of Hammer:

- Max. Dia.: 350mm
- Max Length: 250mm
- Max. Weight: 25kg

Induction Heater

- Much shorter heating times, minimizing scaling and oxidation.
- Easy and accurate temperature control. Parts at temperatures outside specifications can be detected and removed.
- No time lost waiting for the furnace to ramp up to the required temperature.

Why CHOOSE US?

- Faster sample development and capable of ramp-up production in less time.
- CNC machining of components - Qty. 100 to 10,000pcs.each, per month.
- Turning centers-10 Microns
- Creative ideas for VA/VE
- In-house design of machining & inspection fixtures

450+
PRODUCT DEVELOPED

40+
YEARS OF EXPERIENCED TEAM
